

PNY Youth Coding Bootcamp (Cohort 4) Mid-Course Exam
Exam Duration: 45 minutes

Name: _____

Date: _____

1. Which of the following HTML elements can be used to link different web pages together?
 - A. <link>
 - B. <a>
 - C. <nav>
 - D. <h1>
2. What is the standard **file name** for the entry point to your website?
 - A. <!DOCTYPE html>
 - B. entripoint.html
 - C. index.html
 - D. main.js
3. Which HTML attribute is used to **uniquely identify** an element on the page?
 - A. id
 - B. href
 - C. name
 - D. class
4. Which of the following is an example of a **class** being used as a CSS selector?
 - A. #main-section
 - B. h1
 - C. button:hover
 - D. .main-section
5. What is the purpose of the HTML <section> tag?
 - A. To create a visible border around a section of the web-page
 - B. To display the elements in the section in a row
 - C. To semantically group multiple elements that belong together
 - D. To provide interactive functionality to part of the web-page

For the questions 6, 7, and 8, consider the code above.

index.html

```
<!DOCTYPE html>
<html>
  <head>
    <link rel="stylesheet" href="style.css">
    <title>My Webpage</title>
  </head>
  <body>
    <header class="page-header">
      
      <h1>My Webpage</h1>
    </header>
    <article class="content">
      ...
    </article>
  </body>
</html>
```

style.css

```
* {
  margin: 0;
  box-sizing: border-box;
}

.page-header {
  background-color: #53329c;
  color: #ffffff;
  display: flex;
}

.content {
  color: #272629;
  max-width: 50rem;
}
```

6. To what kind of HTML element will the color `#ffffff` be applied?

- A. h1
- B. body
- C. article
- D. All of the above

7. What property should be added to `.page-header` to space out the `img` and `h1` elements?

- A. width
- B. gap
- C. height
- D. size

8. Which elements have the `margin: 0` property applied to them?

- A. logo
- B. header
- C. article
- D. All of the above

For questions 9, 10 and 11, consider the code below.

index.html

```
<!DOCTYPE html>
<html>
  <head>
    <link rel="stylesheet" href="style.css">
    <title>My Webpage</title>
  </head>
  <body>
    <div class="card">
      <p class="testimonial" id="testimonial-one">...</p>
    </div>
  </body>
</html>
```

style.css

```
.card {color: red; font-family: sans-serif;}
.card p {color:blue; font-size: 150%;}
#testimonial-one {color: green;}
.testimonial {color: black; font-size: 120%;}
```

9. What color will be applied to the text in the paragraph tag?

- A. Red
- B. Blue
- C. Green
- D. Black

10. What font-size will be applied to the text in the paragraph tag?

- A. 100%
- B. 120%
- C. 150%

D. None of the above

11. Of the selectors used in the above stylesheet, which is the most specific?

- A. #testimonial-one
- B. .testimonial
- C. .card
- D. .card p

For questions 12 and 13, consider the code below.

index.html

```
<!DOCTYPE html>
<html>
  <head>
    <title>My Webpage</title>
  </head>
  <body>
    <header>
      <h1 class="page-heading">Page Header</h1>
    </header>
    <section>
      <h1 class="section-heading">Section #1</h1>
      <div class="text-content">...</div>
    </section>
    <section>
      <h1 class="section-heading">Section #2</h1>
      <div class="text-content">...</div>
    </section>
  </body>
</html>
```

12. Which of the following best describes the web-design mistake being made in this HTML?

- A. h1 tag is being used improperly; only the page heading should use an h1.
- B. h1 tag is being used improperly; there should be no h1 on this page
- C. There should not be two elements with the class "section-heading".
- D. All of the above

13. You want to add a section at the bottom of the page to include your email address and copyright information. Which of the following is the most appropriate enclosing tag?

- A. section
- B. div
- C. nav
- D. footer

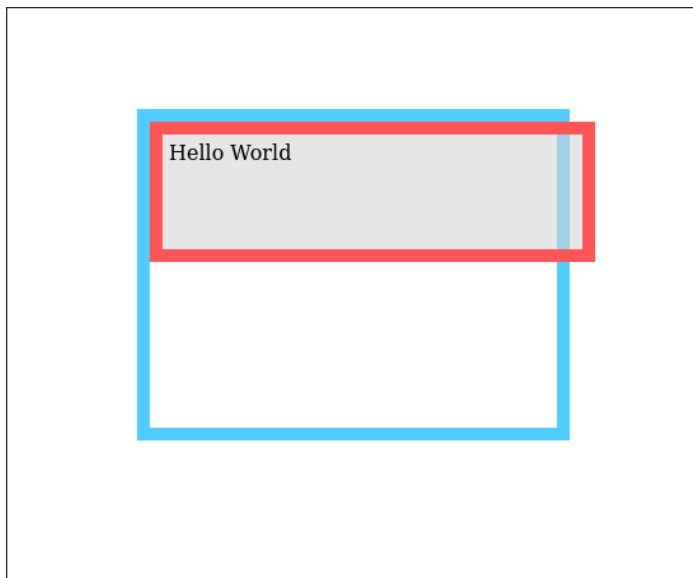

14. Which of the following HTML tags belongs in the head of the document?

- A. <html>
- B. <header>
- C. <title>
- D.

15. You have an element with multiple child elements. You specifically want the third child to have unique styling. What is the best way to achieve this?

- A. Give the third child a unique class and target that class in our stylesheet
- B. Make that child a different type of element and target that element type in our stylesheet
- C. Use the nth-child pseudo-class
- D. Use the focus pseudo-class

16. Observe the following image from a webpage:

Notice that the child element is extending beyond its parent element. What can we change to prevent this from happening?

- A. Reduce the padding of the child element
- B. Increase the width of the parent element
- C. Set the parent's position to "relative" and the child's to "absolute"
- D. Set both elements' box-sizing properties to "border-box"
